2 Күсә

$$1) (198 + 44311 : 73) - 460 \cdot 306 : 391 + (76 - 104 - 6087) = 888 \quad -$$

$$2) 3216 : (87 - 13x) + 793 = 860$$

$$(3216 : 74x + 793 = 860)$$

$$3216 : 74x = 860 - 793 \quad \checkmark$$

$$3216 : (87 - 13(1)) + 793 = 860$$

$$860 = 860$$

$$3) 26 \cdot (36 + 5) + 56 \cdot (3 - 6) = 969 \quad -$$

$$4) 350 \mu - 232 \mu = 118 \mu \quad \checkmark$$

$$118 \mu - 16 \mu = 102 \mu \quad -$$

$$5) p = (196 \text{ м}^2 + 49) a + b$$

$$p = 196 \text{ м}^2 + 49 \text{ м}^2$$

$$p = 147 \text{ м}^2$$

$$S = (a \cdot b) \cdot 2$$

$$S = (196 \text{ м}^2 \cdot 49 \text{ м}^2) : 2$$

$$S = 4752$$

2 уна
